POTATO PRICES ADVANCE 10C.

Receipts Will Be Very Small the Next Aside from the arrival of the first peaches

of the season the feature of the produce some time later than this when the first | markets yesterday was an advance of 10 and new. This puts the price to \$1.60. During the next two weeks receipts of not be lower until the Tennessee crop comes onto the market. That will be between the

> Heavy rains in Texas and Arkansas are the causes for the falling off in the receipts. The crops in both States-which, early in the sason promised to be much larger than last year's yield-have been practically ruined by the rains. In the first place the crops were badly damaged while they were maturing. And now that they have matured, thousands and thousands of bushels have been rotted by the rains of the past week, and in many sections of Arkansas | straw, \$6; rye straw, \$6. digging has been put out of the question by the water. As these two States furnish most of the potatoes consumed here until the Tennessee crop is marketed, the present conditions

WHEAT STOCKS DECREASE

DEPLETION OF STOCKS HAD BULLISH EFFECT ON MARKET YESTERDAY.

At the Close July Showed 5-Se to 3-40 Gain-Easier Cables Helped Cause Weak Opening-Corn Up.

CHICAGO, June 7 .- A large decrease in the world's visible supply was perhaps the principal bull influence in the wheat market to-day. Crop damage reports from the Southwest, however, were of almost equal wheat showed a gain of %6%c. Corn is up 340%c. Oats advanced 1/4014c and provi-

Improved weather conditions and easier cables caused a small decline in wheat at the opening, initial sales of July being down lee to lee, at 8716c to 874c. On as active demand from shorts and good commission house buying sentiment soon Northwest had an important bearing on the early situation. The tenor of crop news from the Southwest also was generally considered quite bullish. An official forecast of more showers for that section brought out additional buying orders. Offer ings, however, were not large, and as a result prices steadily advanced.

The market was further strengthened by the world's visible supply figures, Bradstreet's report showing a decrease in available stocks of 4,000,000. There was some reaction on selling, due to expectations of a bearish Illinois crop report, but the declining tendency was soon checked and prices again started upward. Strength in corn was a help to the late wheat market. Just before the close reports of a big rop in Manitoba caused some realizing,

however, continued firm. The high point on July was reached at 88%@88%c. The close was at 88@881/c. Clearances of wheat and flour were equal to 86,300 bu. Primary receipts were 352,100, compared with 261,600 a year ago. Minneapolis, Duluth and Chicago reported receipts of 246 cars, against 570 cars last week and 304 cars a year ago.

resulting in another setback. Sentiment,

Under active covering by shorts a rally per keg, \$4.33; mule shoes, per keg, \$4.30; horse | of about a cent occurred in corn. With the exception of large primary receipts, the news of the day was extremely bullish. Receipts were 300 cars less than the number estimated, cash prices were up 1 to 2 cents and the weekly Weather Bureau report showed the crop to be in a very backward condition. A forecast of more rain in the corn belt also helped to increase bullish sentiment. The market closed almost at the highest point of the season. July opened a shade lower to 16014c higher, at 18%c to 48%c, sold up to 49%@49%c, and closed at 49%c. Local receipts were 667

cars, with 55 of contract grade. Oats were quite dull, but stubbornly firm. Strength of wheat and corn was the main sustaining influence. There was no attempt made to sell on the bearish weekly government report, scalpers apparently being afraid to take the short sides. July opened unchanged at 39%c, ranged between 39%@ 391/2c and 40c, closing at 393/4@391/3c. Local receipts were 208 cars. Trading in provisions was more active and the market manifested greater strength than for some time past. There was an urgent demand from shorts and a prominent packer also was a heavy purchaser.

Light receipts of hogs with a firm market at the yards was responsible for much of the buying. The close was at the top, with September pork up 3712c at \$12.3212. September lard closed with a gain of 15c at \$6.80. Ribs made an advance of 171/20, closing at \$7.121/2667.15. Estimated receipts to-morrow: Wheat, 35 cars; corn, 325; oats, 91; hogs, 38,000 head. Leading futures ranged as follows: High-Low-Articles. Open-Wheat-

of the buying was thus enhanced. The money market was almost stagnant and rates were inclined to droop, though with little money offering at the present unattractive rates. The advance in the sterling rates at Paris to 25 francs 171/2 centimes was a decisive indication that the course of capital was no longer drawing toward that center. Incoming gold to the London market was

accordingly taken by the Bank of England, with no demand for Paris account. The discount market was yielding, both in Paris and London. The market for sterling here also yielded, thus deferring, if not averting an outgo of gold to London from here. Prices eased off in the final dealings, but the closing was steady.

NEW YORK, June 7 .- There was a little more activity and firmness displayed in the stock n'arket in the last hour to-day than has been noticeable for nearly i week. The principal cause of this improvement may be attributed to the extensiv

short interest encouraging professional traders to buy for a turn, and other larger operators to move against it for manipulative purposes. The movement in Ontario & Western the last few days has shown the trading element what is being done in the way of creating a better market for trading purposes. St. Paul was picked out as the leader and next Pennsylvania and Union Paciac, and the whole market was advanced under the lead of these stocks. Nearly all the trading element lent a hand in helping along the improvement, as they are in the sumor just now to assist any movement in prices either way if it can be made extensive enough to offer operations for profit on either bull or bear side. These have been 'ead so long that to-day's improvement as stimulated a general better feeling and has revived the hope that the do still better, at least long market ma

NEW YORK, June 7 .- Although the trading in Ontacio & Western to-day was relatively heavy it was not on the same scale as yesterd y and the market in consequence prejented an appearance of less animation. As a matter of fact trading was in small volume and if the sales in Ontario & Western were eliminated the total for the trading session would have been decidedly small. The trading in Ontario & Western gave evidence to-day, as it did yesterday, of some manipulation, and there are many who believe that the movement in the stock is purely speculative. Some doubt is expressed as to the ability of the voting true ees to abolish the trust, even though the desire to do so. Under the terms of the trust it cannot be dissolved until a dividend has been earned and paid on the common stock. The earnings available for dividends, even last year, were less than 1/2 per cent. on the stock. The price to-day was advanced to 25%, but it

enough to sermit making a "turn."

[Meyer & Kiser.]

mation of any kind in the rest of the market. Steel preferred, Union Pacific, St. Paul and Reading were firm and held their own. Southern Pacific was relatively ten shares. strong. The Erie issues showed little Chicago Great Western common showed a little strength, but the trading was light. London did very little in the market. The bond market was quiet and no change. . R. Thompson & Co.J

influences 13-day, the general list following 10 cents over the price at which the dividend more or less closely the movements of that stock. After the opening weakness developed in Ontario & Western and was communicaled to the remainder of the but later, Epon buying of Ontario & Western, the whole list was benefited and a general rally set in, due principally to traders bidging up prices. A reaction set in toward the close, however, and some of the gains were lost, but the market closed Considerable short covering helped the rally along, but the movement was entirely professional, and we do not believe it will be long maintained. C. F. braulik & Co.]

NEW YORK, June 7.- The opening in stocks this morning was without any spe- year. Closing quotations: cial feature. Most of the list was a fraction lower than last night's close and some further recession took place in the first Atlas Engine Works pfd... hour's trating. Business was dull for most dollar a stare caused by some liquidation | Central Trust Company. on the part of the room trading element, who had cought Ontario & Western yesterday afternoon on the bulge, another good buying movement set ir in that stock and it ross rapidly, regaining all the early loss, and fold up to 25% without any set- Indiana National Bank .. back. At the top price, however, there Indiana Title Guar, and Loan Co. .. was considerable for sale, and a lack of supporting orders caused a recession of part of the advance. There are many rumors regarding the accumulation of this stock, but mothing authentic that can be verified up to the present time. The buoyancy in Ostario & Western had a stimulating effect on the balance of the list, notably schamong the coalers. There was Ind'p'i's Tractional and Terminal. some show covering in the Steel stocks and also in Eries. Pennsylvania was well bought, also Reading common and the second prefered. While the center of interest | New Telephone, long distance. has been Ontario & Western, still there | People's Deposit Bank was a much better distribution of orders | Rauh Fertilizer pfd...... to-day than for many days, and the close shows that buoyant feeling exists in the greater part of the list. Whether it can be Union Traction pfd...... attributed to outside buying or short cover- Union Trust Company..... ing is, of course, problematical, but for the Van Camp Hardware Co. pfd....... 103 rather prinature to look for any advance of consequence in stocks, and, while there may be a further rally, it is likely to be confined specialities and not the list in general. Close is steady to firm, with the general. advance wirly well held.

CONDITION OF CROPS.

WASHINGTON, June 7.-The Weather Bureau's veekly summary of the crop conditions is as follows:

While too cool for best results in portions of the lake region and in the Missouri vallev and nothern Rockey mountain districts, with excasive moisture and lack of sunshine in central Mississippi and lower Missouri valleys, the week as a whole has been very favorable in the districts east of the Rock mountains.

Drough in the South Atlantic district Good Industry for Gas Belt Town gulf States has been very generally relieved, although more rain is needed in portions & Florida and in the central and west coast districts. The North Pacific coast also experienced a favorable week, but in Clifornia nearly all crops were injured by continued drying north winds. Over the western portions of the corn belt of state yesterday. It will be known as the grow of corn has been checked by lack of tarmth and sunshine, and it Seed of cultivation, while in the much in central and eastern districts planting and facture metal wheels of all descriptions replanting have been delayed by rains. Poor staus are reported from the lake region, Ocio valley and middle Atlantic States. In the Southern States, the general | Merker, J. G. Brannum and Charles Heart. condition of corn is promising, although rain is no ded in the central gulf coast districts.

Winter theat has suffered somewhat from is in portions of Oklahoma and | Wissler and A. R. Feemster. heavy ra elsewhere this crop has advanced but the outlook over the eastern favorably the winter wheat belt continues portion (unpromising, although more or less improved to the Ohio valley and middle At- G. out the central valleys and middle Atlantic States, and a general improvement in the condition of this crop is indicated in nearly all districts. Seeding is now practically finished in the extreme northern sections, and harvesting continues in the Southern States. As a whole there has been quite a decided improvement in the condition of cotton over nearly the whole of the cotton belt. The crop has, however, suffered some damage in Oklahoma and Indian Territory from overflows and from insufficient moisture in scattered localities in Louisiana. Rapid growth and a good state of cultivation are generally indicated. Boll weevils are increasing rapidly and doing considerable damage in a number of southwestern and south central counties in Texas.
